

DEV CASTELLANO

Senior Backend Engineer

Austin, TX · dev.castellano@example.com · +1 512 555 0199 · github.com/dev-castellano-example

SUMMARY

Backend engineer with 11 years building high-throughput services in Go, Java and Python. I own systems end to end: design, on-call, cost. Looking for senior or staff backend roles, remote in the US.

EXPERIENCE

Senior Software Engineer, Payments Platform – Lattice Pay (fintech), Remote – 03/2021 – present

- Led the rewrite of the ledger service in Go; p99 latency down from 420 ms to 85 ms at 9k requests/s.
- Designed idempotent payment APIs used by 30+ internal teams; cut duplicate charges to near zero.
- Moved batch settlement from cron jobs to Kafka streams; saved \$310k/year in compute.
- Mentored 5 engineers; ran the backend interview loop.

Software Engineer II – Corvid Logistics, Austin, TX – 06/2017 – 02/2021

- Built route-pricing services in Java/Spring on AWS (ECS, RDS, SQS).
- Introduced contract testing and OpenTelemetry tracing across 40 services.

Software Engineer – Brightwater Labs, Dallas, TX – 07/2014 – 05/2017

- Python/Django APIs for a healthcare scheduling product; PostgreSQL tuning.

SKILLS

Go, Java, Python, Kotlin, PostgreSQL, Redis, Kafka, gRPC, AWS, Terraform, Kubernetes, Datadog, system design, on-call leadership

EDUCATION

B.S. Computer Science, Texas A&M University, 2014
